Slack On-Call Support Agent

Capstone Project

Slack On-Call Support Agent

Problem

On-Call

- Engineers need instant incident guidance
- System knowledge scattered across tools and team members
- Context switching inefficient and slows incident response time

Slack On-Call Support Agent

Solution

On-Call Support Agent

- One-stop shop for application support within Slack
- Incident resolution knowledge base (RAG) informs agent responses
- GitHub repository exploration (MCP) provides system design and onboarding support

Architecture

AI

RAG

MCP

On-Call Support Agent

Commands

/ask

- Private direct message for general application support

/incident

- Retrieve resolution steps from documented runbooks using RAG

/code

- Explore codebase to answer system design questions using MCP
